PROFILE

Motivated Software Engineering student and aspiring Full-Stack Developer with 2 years of programming experience. Skilled in building web applications using HTML, CSS, JavaScript, React.js, Node.js, Express.js, SQL, and Python. Experienced in developing frontend interfaces, backend fundamentals, and database-driven applications. Passionate about solving real-world problems through technology, continuous learning, and creating efficient user-focused software solutions.

PROJECTS

Student Planner & Calendar Web Application

Tech: [HTML](#) | [CSS](#) | [JavaScript](#)

- Developed a student productivity application for managing academic tasks, events, and schedules.
- Implemented calendar features and task organization functionality.
- Built a responsive interface optimized for different screen sizes.
- Applied JavaScript concepts including DOM manipulation and event handling.

Guess My Number Game

[github.com/Tigo1123/Guess-My-Number](#) | Tech: [HTML](#) | [CSS](#) | [JavaScript](#)

- Created an interactive browser-based game using JavaScript.
- Implemented difficulty levels, scoring system, and high-score tracking.
- Developed dynamic user interactions and responsive UI features.

Academic System

SKILLS

▸ Languages

JavaScript, Python, C++, SQL

▸ Frontend

React.js, HTML5, CSS3, Vite, Responsive Design

▸ Backend

Node.js, Express.js, REST APIs

▸ Databases

MySQL, Oracle Database

▸ Tools

Git & GitHub, VS Code, Linux, Cloud

▸ Concepts

OOP, DB Design, Version Control, Problem Solving

EDUCATION

UNILAK

Bachelor of Software Engineering

Kigali, Rwanda | 2024 – Present

CERTIFICATIONS

- ALX Professional Foundations Progr
- Python for Everybody — Coursera
- Frontend Developer Training — Cou

EXPERIENCE

LANGUAGES

Full-Stack Developer — Self-Directed Projects2024 – Present

- Designed and developed web applications to improve software engineering skills.
- Built frontend applications and explored backend development using Node.js and Express.js.
- Worked with databases including MySQL and Oracle.
- Used Git/GitHub for version control and project management.
