

TAGELDIN GASMALLA MOHAMED EISA

Software Engineering Student | Full-Stack Developer • Open to opportunities

Kigali, Rwanda | +250 795 331 304 | al.taj.gsm@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL SUMMARY •

Software Engineering student and Full-Stack Developer building responsive, database-driven web applications with React, Node.js, Express, PostgreSQL, and Prisma. Hands-on experience with REST APIs, authentication, role-based workflows, testing, deployment, and end-to-end project delivery. Focused on clean, reliable, user-centered software and continuous growth through practical engineering work.

TECHNICAL SKILLS •

Languages: JavaScript, Python, C++, SQL	Frontend: React, HTML5, CSS3, Vite, Responsive UI
Backend: Node.js, Express.js, REST APIs, Prisma	Databases: PostgreSQL, MySQL, Oracle Database
Tools: Git, GitHub, VS Code, Linux, CLI	Concepts: OOP, Relational DB Design, Authentication/RBAC, Problem Solving

SELECTED PROJECTS •

Clinic Management System [Live Demo](#) | [GitHub](#)

Tech: React, Vite, Node.js, Express, Prisma, PostgreSQL

- Built a full-stack clinic platform covering appointments, consultations, lab orders/results, pharmacy dispensing, inventory, and billing.
- Implemented authentication and role-based access, then validated end-to-end clinical workflows with automated tests and staging deployment checks.

Student Planner [Live Demo](#) | [GitHub](#)

Tech: React, Vite, Express, Prisma, PostgreSQL

- Developed an academic planning application for tasks, events, courses, assignments, exams, schedules, and reminders.
- Built a responsive frontend with authenticated APIs and persistent relational data.

Guess My Number [Live Demo](#) | [GitHub](#)

Tech: React, Vite, JavaScript

- Created a responsive browser game with difficulty levels, score/high-score tracking, multiple modes, and persistent local profiles/history.

EXPERIENCE •

Full-Stack Developer - Self-Directed Projects | 2024 - Present

- Build and iterate on end-to-end web applications spanning responsive interfaces, REST APIs, relational databases, testing, and deployment.
- Use Git/GitHub and Linux-based development workflows to validate changes and maintain project codebases.

EDUCATION & CREDENTIALS •

UNILAK

Bachelor of Software Engineering
Kigali, Rwanda | 2024 - Present

CERTIFICATIONS & TRAINING

- ALX Professional Foundations Program
- Python for Everybody - Coursera
- Frontend Developer Training - Coursera

LANGUAGES •

Arabic (Native) • English (Intermediate)
